

# Gresham House Euro Liquidity Fund

## January 2026

The Gresham House Euro Liquidity Fund (the Fund) is an actively managed fund which is primarily invested in short-dated government debt but may also invest in cash deposits, European corporate debt and Floating-Rate Notes (FRNs).

The Fund invests across a range of debt instruments and deposit institutions to diversify risk. The aim is to generate an appropriate level of return, while maintaining a low level of volatility and preserving capital over the long-term. This weighting could involve an increase in the short-term volatility profile of the Fund.

### Fund objective

The investment objective of the Fund is to provide liquidity to the extent consistent with the preservation of capital.

The Fund seeks to achieve its investment objective by investing on a diversified basis in deposits and debt securities.

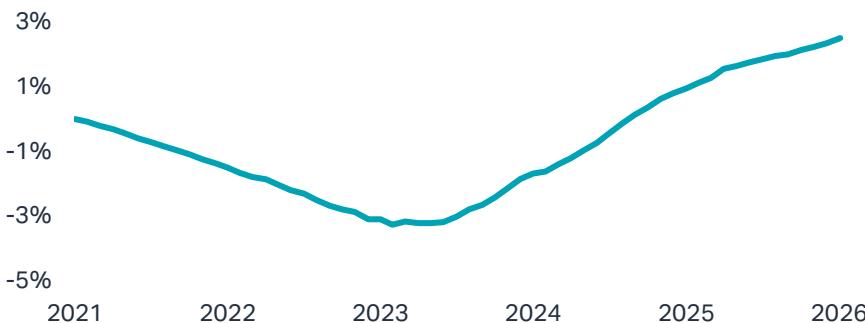

### Fund positioning

As of June 2023, to reflect the material change in ECB rates, the Fund made a full reallocation to short-dated government bonds.

This was to allow the Fund to capture a yield pick-up in European Government Bonds versus current bank deposit interest rates available in Ireland.
