

Gresham House
Specialist asset management

Strategic Equity Capital plc (SEC.LN)

Introduction presentation

April 2021

IMPORTANT INFORMATION

- The value of the fund and the income from it is not guaranteed and may fall as well as rise. As your capital is at risk you may get back less than you originally invested
- Past performance is not a reliable indicator of future performance
- Funds investing in smaller companies may carry a higher degree of risk than funds investing in larger companies. The shares of smaller companies may be less liquid than securities in larger companies
- This fund may experience high volatility due to the composition of the portfolio or the portfolio management techniques used

STRATEGIC EQUITY CAPITAL PLC (SEC)

Application of private equity techniques to public small companies

- **Differentiated strategy** with highly-concentrated portfolio, deep research focus and engaged approach
- **Genuine small cap** - a structurally overlooked part of the market
- **Long term investment horizon**, low portfolio turnover with a **quality company focus**
- **Small-cap specialists** with significant public and private equity expertise leveraging Gresham House's broader platform and network
- **Recent team changes** with objective to **drive performance** and **close discount to NAV** leveraging track record of Ken Wotton and the Gresham House equities team

Specialist equity fund targeting absolute returns (15% IRR)¹ over the medium term.

Low correlation to market and peers.

Defensive characteristics. Tendency to outperform in weaker markets.²

1. Internal target only, not guaranteed

2. <http://performance.morningstar.com/funds/cef/ratings-risk.action?t=SEC®ion=gbr&culture=en-US&ownerCountry=USA>

INTRODUCING STRATEGIC PUBLIC EQUITY

An alternative investment strategy that applies private equity investment processes to public companies

Highly engaged strategy driving strategic, operational or management initiatives

Targeting inefficient areas of public markets

Thorough due diligence to identify value creation catalysts
Leveraging our network of experts

Influential minority stakes

Focus on intrinsically undervalued, cash generative companies.
A “value approach”

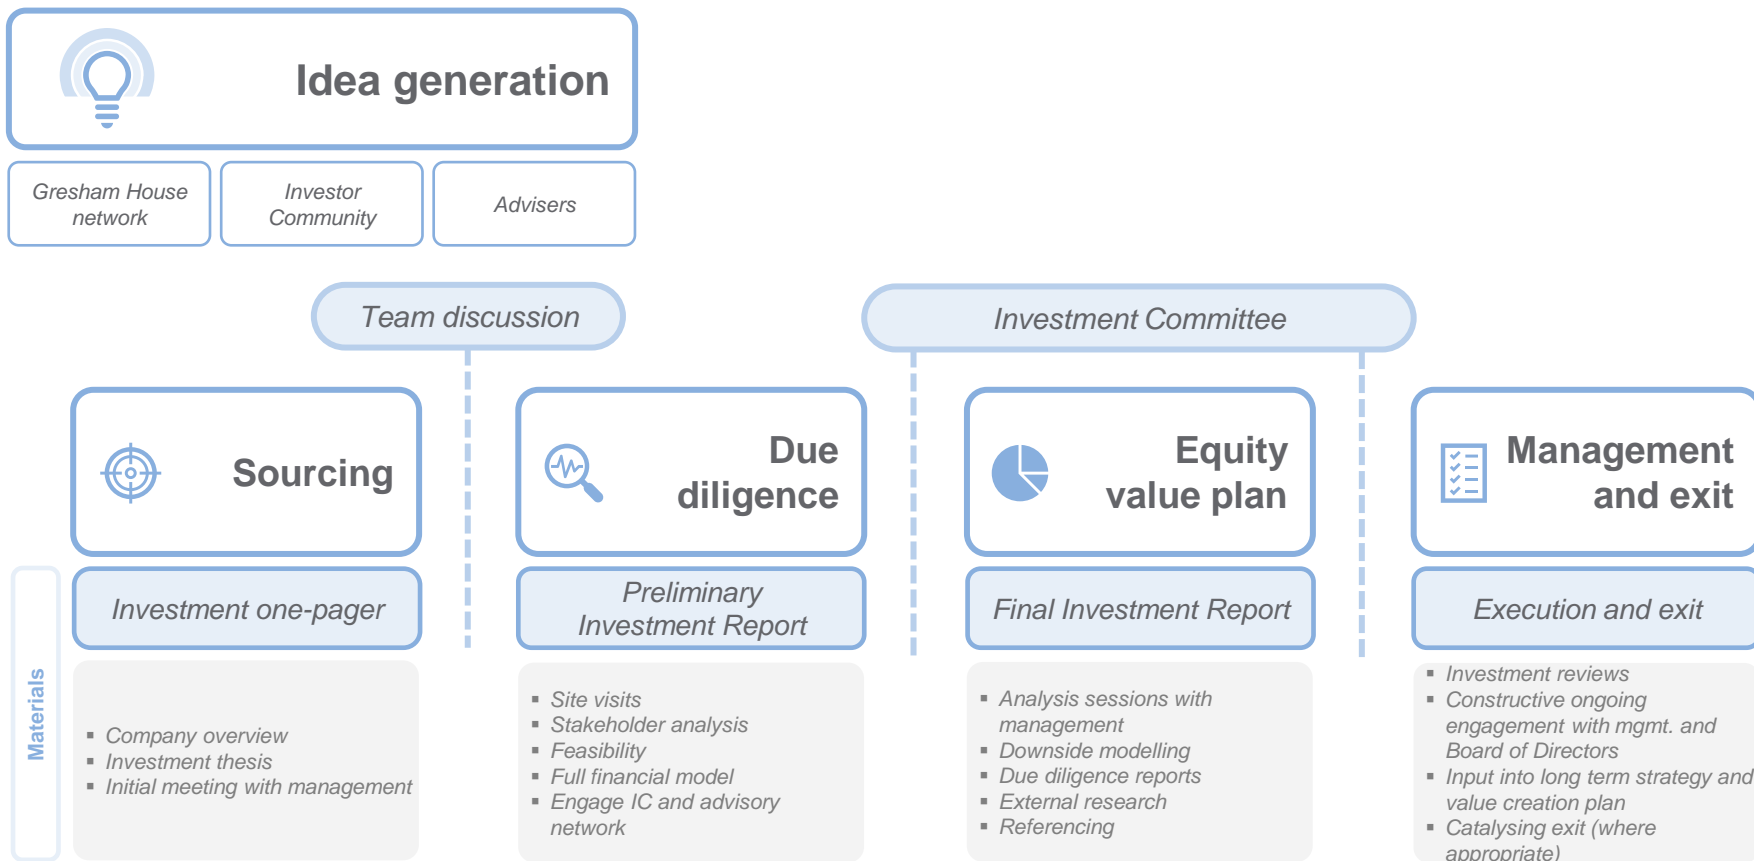

Concentrated & flexible mandate:
up to 20% can be invested in unquoted

Past performance is not necessarily a guide to future performance.

Portfolio investments in smaller and/or unquoted companies typically involve a higher degree of risk.

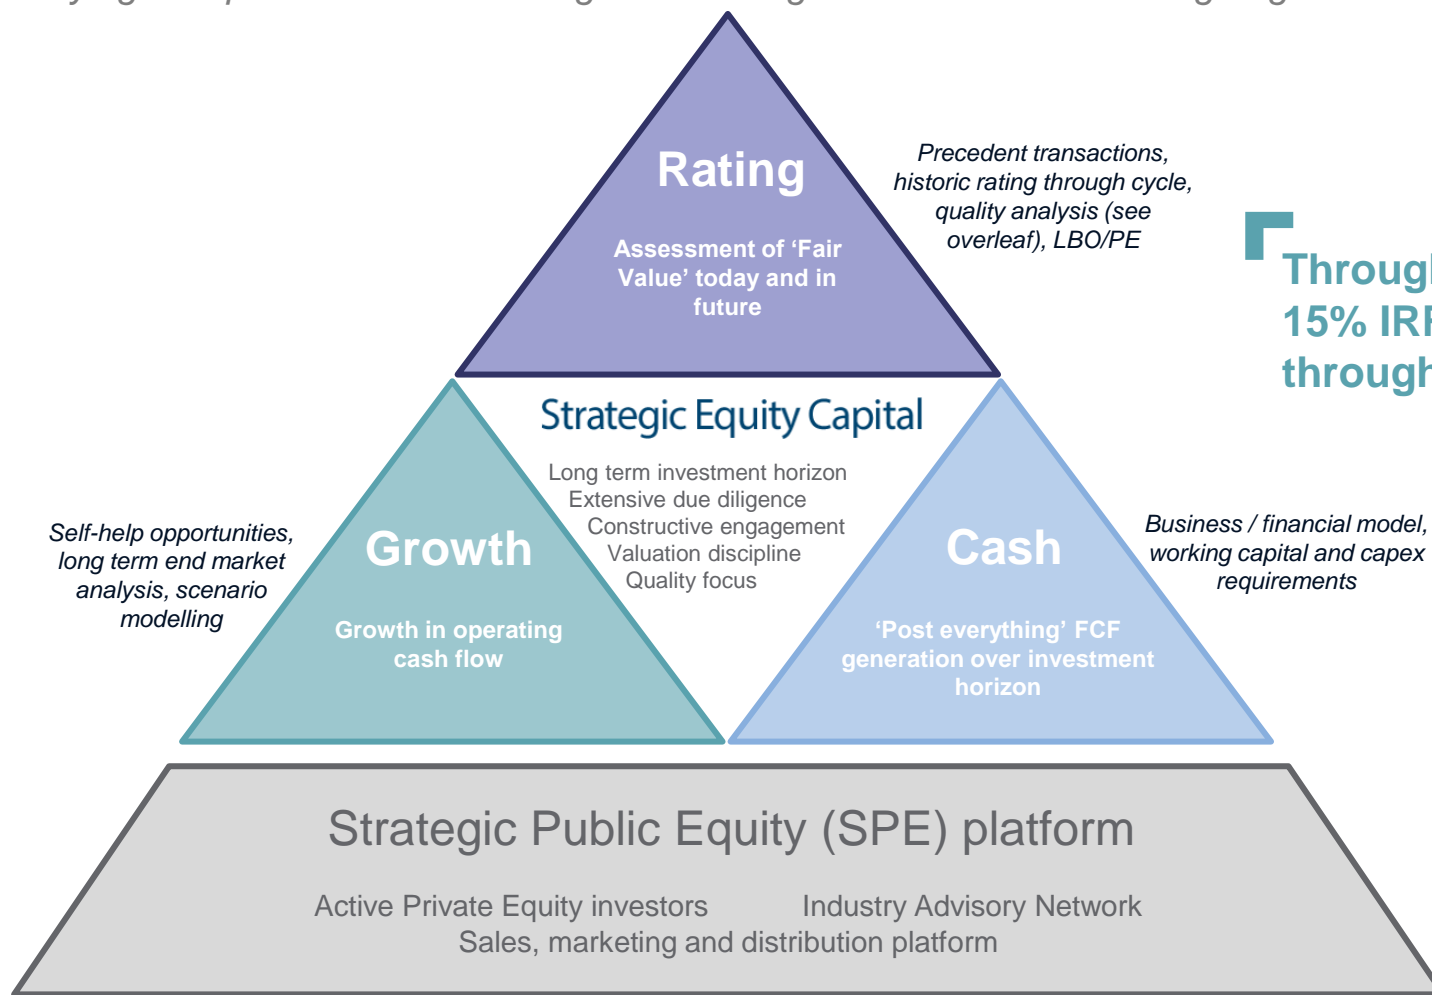

PROCESS MODELLLED ON PRIVATE EQUITY

Four stage investment process, with multiple touchpoints and Investment Committee input

FOCUS ON LONG TERM DRIVERS OF VALUE

Identifying multiple drivers of returns gives a stronger likelihood of achieving target investment returns

Through this target a 15% IRR¹ with upside through M&A

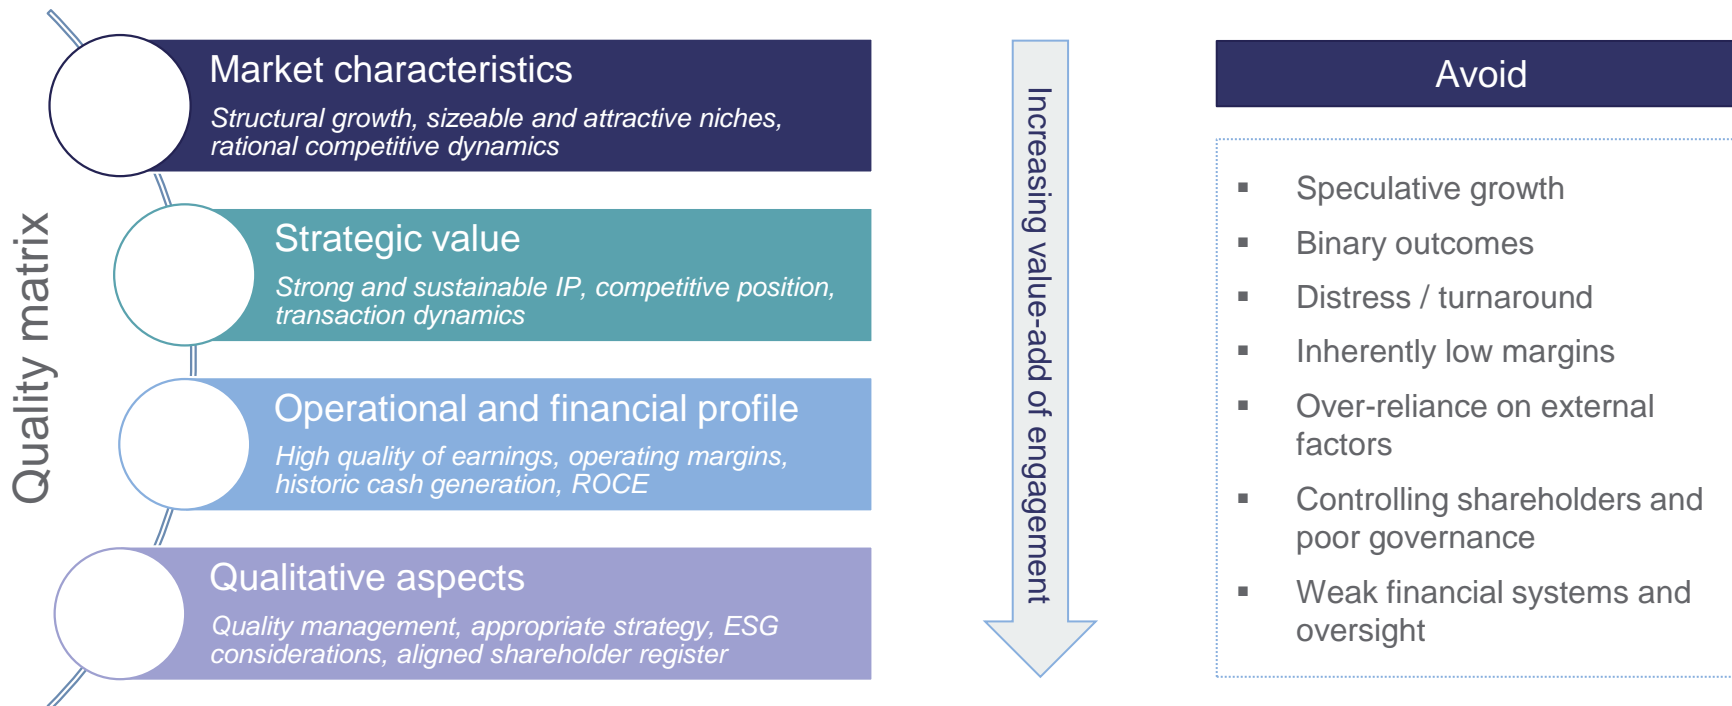

1. Internal target only, not guaranteed

**Past performance is not necessarily a guide to future performance.
Portfolio investments in smaller companies typically involve a higher degree of risk.**

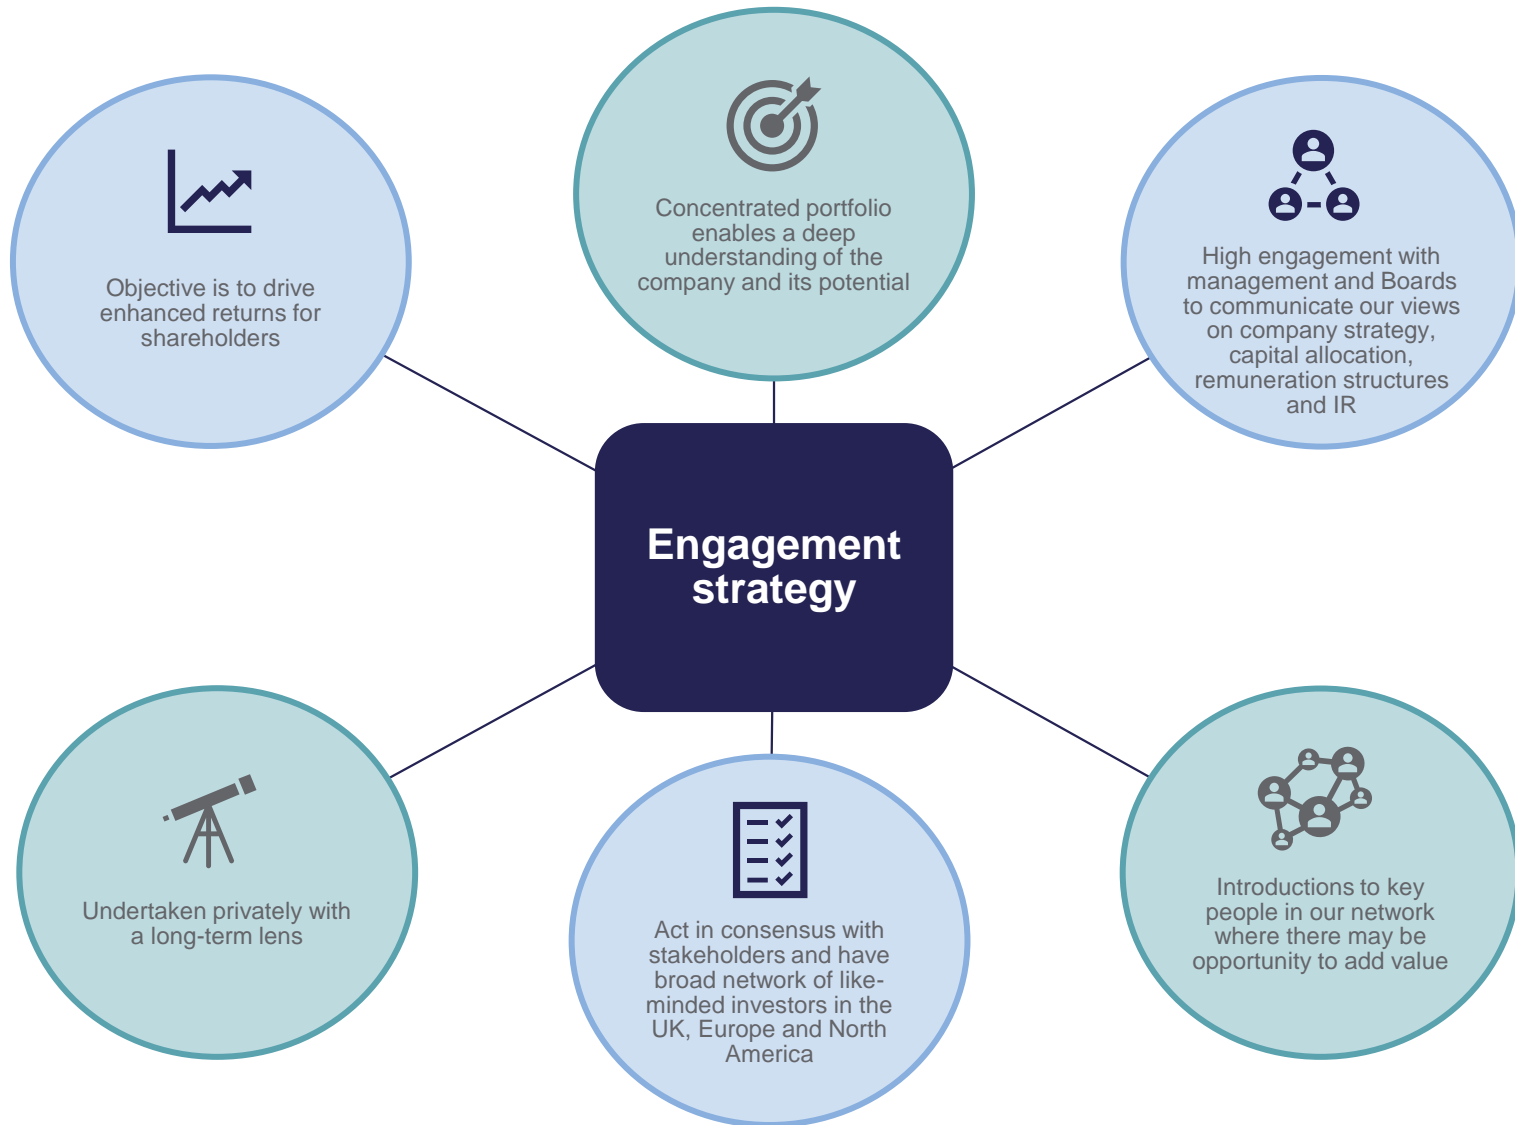

OUTPUTS OF INVESTMENT PROCESS

Applying a private equity approach to public markets

What do we look at?

ENGAGEMENT STRATEGY

ESG FOCUS: PUBLIC EQUITY

As long-term investors with a focus on small and micro-cap companies in the UK equity market, we are active stock pickers applying a private equity approach to quoted equities. We offer a range of investments including our open-ended equity funds, listed strategic public equity investment trusts and limited partnership vehicles.

Our public equity philosophy revolves around taking a hands-on approach to engaging with our investee company stakeholders, including management, shareholders, customers and suppliers, in order to capitalise on market inefficiencies and identify value creation and recovery opportunities.

ESG Implementation

4.8 years
weighted average holding period as at 31 December 2020

We are proud signatories to the following member organisations:

Case study

Changing the way businesses purchase and use energy

The business

Inspired Energy plc is a leading UK corporate energy services and procurement specialist. They are energy management experts and work with corporate energy consumers to optimise their energy costs. The company provides three key services:

We invested in the company when it first listed in 2011 but worked with the management team before this point on areas such as Board composition and management incentives prior to IPO.¹ Since 2011 we have regularly engaged with the management team on various projects, most notably:

1. Business strategy
2. Raising capital for expansion
3. Board composition and planning

Specialises in end-to-end solutions for investors and Corporate Businesses to make effective ESG Disclosures and transform them into ESG Impacts

Delivers energy, water and sustainability assurance and optimisation services, so Corporate Businesses can manage their costs better, reduce their carbon efficiently and meet their net zero targets.

Delivers technology and software solutions that underpin the services provided by Inspired PLC and makes them available to third parties.

1. Initial Public Offering
2. Holding across all Gresham House funds as at 31 March 2021

Case studies selected for illustrative purposes only to demonstrate investment strategy and are not investment recommendations.

ERGOMED PORTFOLIO REALISATION CASE STUDY

Background

- Ergomed is a specialist pharmaceuticals company. It has two services businesses; Clinical Research Services and Pharmacovigilance (drug safety monitoring). It also has a products division co-developing early stage pharma assets
- Following a period of diligence, our interest grew following engagement with the new Chairman, Peter George who we knew well from Clinigen. We purchased our initial stake in a founder placing at 190p in April 2018 and scaled the position over the following months
- The two service businesses are high quality in our view with structural growth given the trend towards outsourcing in pharmaceuticals and attractive financial characteristics. Our view was the company should focus on these two divisions and cease co-development activities which delivered a low return on investment
- In the two years following investment, after initial challenges in managing growth, the company has upskilled management and the Board with strong sector experience from Chiltern, a CRO which was sold to Covance in 2017
- Earnings momentum has been strong as the company has focused on its core capabilities with strong cash generation allowing bolt-on M&A. This has led to a re-rating more in line with similar companies in the industry
- Realisations on strong share price performance; final sale at 875p. IRR over investment period of 72%

Active Ownership and Value Creation

Investment thesis

Rating

On a SoTP basis, the two services business are worth mid-teens EBITDA multiples
Re-rating from ceasing co-development and continued growth in services division

Growth

Structural growth from outsourcing to specialists
Increasing R&D investment (CRO) and regulation (PV)

Cash

Capital-lite business model with high margins
Net cash balance sheet

Chart source: Bloomberg, as at 31 Dec 2020

Case studies selected for illustrative purposes only to demonstrate investment strategy and are not investment recommendations. Past performance is not necessarily a guide to future performance. Portfolio investments in smaller companies typically involve a higher degree of risk.

IFG GROUP TAKEOVER CASE STUDY

Background

- On 25 March 2019, a recommended cash offer was made by Epiris Funds at 193p, a 46% premium to the closing share price, a trailing PE valuation of 21.4x. SEC owned 9.9% of the shares in issue
- The company's rating had been impacted by the aborted sale of Saunderson House in early 2018 and the emergence of a legacy issue (Elysian Fuels) and potential financial liability. Both were discrete and, in our view, didn't affect the long-term quality of the business and its end markets
- We commented as such in our FY18 Annual Report: *'Our view remains that the individual businesses... are independently more valuable than in the current group structure and than the prevailing share price suggests. Ongoing consolidation and an increasing incidence of listed peers in both the wealth management and platform industries demonstrate considerable valuation upside in our view.'*
- We presented our analysis and views to new management shortly after they joined in April 2018 and have been heavily engaged with the company's executive management team and Board with a view to maximising shareholder value

Active Ownership and Value Creation

Investment thesis

Rating

Severe dislocation to SoTP valuation based on precedent M&A and peer analysis
Gap to close via a corporate solution

Growth

Structural growth from pensions freedom and favourable demographic and regulatory drivers

Cash

Well capitalised business and strong underlying cash generation
Screens well on LBO basis

Chart source: Bloomberg, as at 30 September 2019

OXFORD METRICS GROUP PORTFOLIO REALISATION CASE STUDY

Background

- Oxford Metrics plc (ticker: OMG-LN) focuses on developing and commercialising image processing and location data technologies
- The company's IP is regarded as industry leading, particularly in its Vicon subsidiary that enables 3D motion capture for the entertainment, engineering and life sciences industries
- Due diligence process initiated in August 2014, and accelerated following the company's decision to focus on profitable divisions and monetise IP in loss making areas. Initial investment December 2014
- Ongoing engagement with management and the Board. Scope for strategic improvement through divestment of sub-scale business units and focus on core activities
- Significant organic growth, rerating and cash generation over five year investment horizon. Sale of stake into market in Q4 2019 and Q1 2020 based on share price reaching our view of fair value
- We commend the management team and Board of the company for consistently strong operational and strategic performance. An exceptional investment for SEC, generating an IRR of 34% and 2.3x money multiple over the course of 5+ years

Active Ownership and Value Creation

Investment thesis

Rating

Underappreciated IP and quality of earnings. Headline valuation and financials misleading given loss making division; attractive SoTPs

Growth

Strong market growth due to increasing utilisation and sophistication of motion capture technology

Cash

Cash generative with net cash balance sheet; potential for excess returns to shareholders

HIGHLY CONCENTRATED & UNCONSTRAINED PORTFOLIO

Sector exposure by value

Value by market cap band

- Sector exposure is an output rather than input. We favour industries with strong structural growth features and companies with attractive business models and financial characteristics
- A highly concentrated portfolio with a focus on smaller companies. We believe this part of the market remains under-researched, accentuated by MiFID II, with good opportunities for active managers

Source: Bloomberg, PATAC as at 31 March 2021

Past performance is not necessarily a guide to future performance. Portfolio investments in smaller companies typically involve a higher degree of risk.
