AUGEAN - CASE STUDY

Investment thesis

Re-rating

Visibility and conclusion of tax investigation will allow business to be valued on an EV basis. Underpinned by tangible assets (waste sites)

Earnings growth

Margin recovery as loss making divisions sold or mothballed. Significant cost base adjustments grow margin

Cash generation

Cash generation from significantly improved margins. Resolution of HMRC offers potential return of cash to shareholders

Return drivers

- Municipal waste drives Augean processing volumes; increasing post-Covid
- Ownership of four hazardous landfill sites; scarce resource, significant UK market share
- Direct long-term exposure to Energy-for-Waste capacity growth
- Cash generation will allow company to enter the dividend list with an attractive potential yield in the coming months

THE MARKET OPPORTUNITY

Inefficient market

- Lack of research for smaller companies, further impacted by MIFID II
- Regulation and liquidity needs has pushed many institutions up the market-cap scale
- Consolidation of FM industry raising 'minimum' market capitalisation

Value vs growth

- Extended low interest rate environment has driven investors to high-growth companies
- Record distortion in the performance of 'value' style vs 'growth'
- 'Growth' style dominates leaving recovery situations stranded - a 'minority sport'
- IHT and VCT flows less 'valuation' conscious, driving up AIM valuations for 'winners' and a loss of 'selling discipline'

RECENT OPPORTUNITIES

WHY INVEST?

In the middle of difficulty lies opportunity” - Albert Einstein

The biggest determinant of future returns is entry valuation

UK Equities are very good value relative to history and other market/assets

The small companies ‘size’ effect is significant

The ‘size’ discount for UK small cap is large vs history

Value factor is out of favour; underperformance stretched vs history

Returns should mean-revert to long-term averages, implying significant outperformance of the factor

Structural factors supporting the strategy have intensified

Market focus on smaller companies deteriorated further post-MiFID II

Significant market dislocation

47% of nav invested in last 12 months during pandemic as opportunities arose

We have the resource and capacity in place to scale the strategy

Nimble Fund and well-resourced Investment Team

January 2021 outlook

Material portfolio catalysts expected over the next 12 months

BE HEARD

Marketing services buy & build - Convertible Loan Note IRR +22.2%, Equity IRR -37%

Investment thesis

Re-rating

Valuation arbitrage - larger companies in sector currently exceed >12x EV/EBITDA¹. If a proven management team could repeat previous success, market likely to re-rate the business as growth strategy realised

Earnings growth

Track record of successful acquisitions provided scope for further M&A. Adding new services to existing platform offered earnings accretion, cross-selling opportunities and margin improvement. Significant revenue and cost synergies available from a buy and build strategy

Cash generation

Strong cash flow generation from operations and earnings growth expectation

Return drivers

- Investment thesis had sought to target the switch away from large conglomerate ad agencies to nimbler, mid-sized digital agencies
- Backing industry figure Peter Scott to deliver a buy and build strategy
- Thesis quickly breached as execution errors emerged in bolt-on acquisitions and Brexit drove end market headwinds
- Gresham House team stepped in, overhauling management and board to limit downside, stabilise business and minimise further losses; EBITDA subsequently recovered from £1m to £4m
- Overall investment downside limited by Strategy's flexible approach to investment instruments via Convertible Loan Note: Premium on capital received on takeover, mitigating losses on Equity
