Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

Objective and investment policy

Objective

To achieve income (money available to be paid out by the Fund) with the potential for capital growth (an increase in the value of the Fund) after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 60% in the shares of small and medium sized UK companies that have a market capitalisation (total value of the company) no greater than the smallest market constituent of the FTSE 100 Index. The Fund may also invest up to 30% in the shares of larger UK companies, bonds (for example, loans to either a company or government that pay interest), money market instruments (which are short term loans that pay interest), deposits, warrants and cash.

The Investment Manager seeks to identify companies, which in their opinion have strong financial performance, established management teams, a sound market position and future growth potential. Investments are selected on the basis of the Investment Manager's opinion in their ability to achieve the income objective of the Fund as well as providing the potential for capital growth.

Other features of the Fund:

Risk and reward profile

- This indicator shows how much a Fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the Fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
 - The Fund has been classed as 5 because its volatility has been measured as above average.
 - This indicator may not be a reliable indication of the future risk profile of this Fund.
 - The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
 - Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.
 - Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
 - Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings (both up and down) in their value.
 - Concentration Risk: The Fund may invest in stocks with a particular industry, sector or geographical focus. This means that the performance of a single industry, sector or geographical region within the Fund has a greater effect (loss or gain) on the value of the Fund.
 - For more information about the Fund's risks please see the Risk Factors section of the prospectus which is available at www.waystone.com.
